

## High Output, Deeply Projected, Soft Light!

The Toplight is a 6k par overhead softlight with 5 times the output of a Spacelight (50fc vs 10fc @25'). Get wide coverage as soft as you like, with your choice of diffusion in two separated frames. Simple, lightweight (43lbs.) and easy to rig, the Toplight hangs horizontally with two 36" x 56" diffusion frames suspended beneath and fully enclosed with aluminized Nomex fabric. (A 1' skirt can be folded up or down). One Toplight can replace 5 Spacelights in many applications, saving instruments, cable, dimmers, power, A/C and weight. Socapex in and out allows multiple units to run off a single feed.

The Toplight was recognized by the Academy of Television Arts & Sciences at the 2004 Primetime Emmy Awards as an "Outstanding Achievement in Engineering Development."

### Features:

- Powerful
- Lightweight
- Quick Hang
- Socapex In and Out
- Large Diffusion Frames
- Your Choice of Diffusion
- Replaces Multiple Space Lights/Coops
- Stackable

### Photometrics:

Wide lamps double diffused with gam spun & gam 10/80.  
 4 ft – 641 fc  
 8 ft – 298 fc  
 12 ft – 150 fc  
 16 ft – 96 fc  
 24 ft – 50 fc  
 32 ft – 38 fc  
 40 ft – 31 fc

### Specifications:

Voltage: 120 VAC  
 Current: 60 Amps (with 1000w globes)  
 Weight: 43 lbs. (19.5 kg) complete with lamps  
 Dimensions: 36" x 56" x 24" (91.4cm x 142.2cm x 61cm)  
 Feed: Socapex in and out

The innovative "Space Bag" accessory quickly attaches to the Toplight at the upper frame level. The shell is rolled up to that level revealing a poly-silk "Space Bag", allowing significant quantities of soft light to project from the sides and bottom of the bag uniformly in a "Lantern Type" Pattern. This is accomplished with a trapezoidal "Mexican Pyramid" internal baffle (Patent Pending) that allows light to be reflected out of the sides and transmitted through the bottom. The Toplight shell and skirt can be pulled over an area of the Space Bag to cut unwanted light in any direction. The baffle is easily removable for traditional downlight use. The Toplight, with the Space Bag accessory, produces a softer (single shadow) higher output "Space type" light pattern than ever available before.
